

Quiet Access Isle of Wight

acoustic access for all - revealing the hidden disability

www.quiet-access.weebly.com

Thank you for allowing use of your establishment. As an age-friendly group focussed on encouraging noise reduction in social spaces we would like to report that we found your establishment to be rated:

- # Thumbs down - no attempt to improve
- * Inadequate provision
- ** Some vestiges of damping
- *** Definite attempt to help
- **** On the right track
- ***** Comfortable acoustic environment

A good score means that we enjoyed the acoustic environment and were able to hold a reasonable conversation.
A poor score means that conversation was difficult and as such we would be disinclined to come again.

Hearing accessibility is important in combating social isolation. People need to get out and go places for a normal social life. Age Friendly Island and Age UK are dedicated to helping elderly and hard of hearing people lead full lives. Those with normal hearing also do not enjoy having to speak competitively.

Thank you, Quiet Access IW.
